Information for Sections Four and Five

Read the handout posted for Section 4 before you come to section!

You will be responsible for identifying the bones and fenestrae in bold type on the handout.

The quiz for Section 4 will focus entirely on the section handout, so if you don’t read it, you will not do well.

You will hand in an exercise at the end of Section 4 that will have walked you through the parts of skeletons. The exercise will be graded.

In Section 5, you will take a quiz (this time focused only on lecture material from the previous week) and then have time to review skeletons for about 45 minutes. You will then take an exam where you need to identify bones and fenestrae.
