June 5, 1970

Reference is made to "Report on Proposed Operations Numbers P 169-1022 thru P 169-1027" and to your request that these abandoned wells be measured from a section corner or other known landmark. As there was no section corner or bench mark available, references are to Antelope Valley Freeway (Route 14) stations.

Mr. E. T. Bush,
State Oil and Gas Supervisor,
San Francisco 11, California.

Dear Mr. Bush:

On August 25, 1944, the following wells of Steuth & Hutchinson in the Redbull field were transferred to York Oil Company:

Sec. 12, T. 11 N., R. 16 W.
Wells No. 5 to 15, inclusive;

Sec. 13, T. 12 N., R. 16 W.
Wells No. "Commercial" 1 to "Commercial" 5, inclusive.

The details of this transfer are as follows: On June 17, 1944, Steuth & Hutchinson quitclaimed the property on which the wells are located to L. A. & L. C. Claspitt, who on August 25 leased the properties to York Oil Company. This information was contained in a letter to you from E. C. Hutchinson dated July 13, 1944, and was confirmed in letters from L. A. & L. C. Claspitt and from York Oil Company dated October 18 and 27, 1944, respectively. We are changing our records accordingly.

Yours truly,

Deputy Supervisor.

Wm. M.
cc - E. Cooley

(Initiated copy filed on record well No. 5, by)
COMMERCIAL OIL CO.

The wells of this company are on the north half of Lot 1, section 13, 3-16. Well No. 1 was abandoned at 700 feet because of casing trouble. Wells No. 2, No. 3, and No. 4 are all producers, at 1000 feet, 700 feet, and 700 feet, respectively. The oil from these wells is somewhat lighter than that from the Alpine and Santa Ana wells, but the production is small. These wells were drilled in 1901 and 1902.

<td>Log of this Well is known as Commercial Oil Company No. 1 and drilled by the Commercial Oil Company about 1901 in the Newhall Oil Field located on the North one-half of Lot 1, Section 13, Tp. 3 North, Range 16 West. Said Well was drilled to about the depth of 700 feet, showed some oil and water. This well had been partly abandoned when we bought said land. Some casing had been pulled and removed by H. C. Needham by orders of the Commercial Oil Company and supposed to be plugged with cement in bottom. The year 1907 E. A. &amp; D. L. Clampitt buying said land and well, at once began repairing, cleaning out and shut off said water in well and found the well cased with 7-5/8 casing to about 400 feet and cased with 5-5/8 casing at 500 feet with about 200 feet of 4-1/2 shot or cut off and cemented. We put in 4-1/2 casing with a hemp packer shutting off the water between the 5-5/8 and the 4-1/2. Cleaned the well to 650 ft. said well showing no water, said well showing oil sand and shale 600 to 650 ft. Well is now pumping about 640 ft.</td>
